Features & Benefits

PATENTED HYDROSHIELD TECHNOLOGY™ Our exclusive Hydroshield Technology™ features fiberglass reinforced door skins, full-length composite stiles, and composite top & bottom rails to prevent water infiltration on all six sides.

FULL LENGTH COMPOSITE TOP AND BOTTOM RAILS Additional non-porous protection keeps water from seeping into the door and helps prevent the buildup of mold or mildew.

FIBERGLASS REINFORCED SKIN

Fiberglass is unmarred by the wear and tear of everyday use and is unaffected by moisture and humidity. Our doors will not rot, splinter or warp like wood, and won't dent or delaminate like steel.

FULL LENGTH COMPOSITE STILES

All fiberglass entry doors feature fully composite stiles to prevent water infiltration into the door's insulation and to ensure warp free, rot free and rust free doors.

ARCHITECTURALLY CORRECT PROPORTIONS

Doors are designed with beautifully detailed panels that are identical to traditional wood door construction to create crisper shadow lines and heightened curb appeal.

INSULATED CORE

Our environmentally friendly insulation is 100% CFC-free and provides a high R-value for maximum thermal protection.

Features & Benefits

COMPOSITE FRAMES FEATURES & BENEFITS

CLOSED CELLULAR STRUCTURE ensures doorframe & molding will not absorb or wick moisture, and prevents warping, rotting, and splitting

RIGID POLY-FIBER FORMULATION eliminates the need for an aluminum support channel

TWICE THE SCREW-HOLDING POWER of traditional wood doorframes

EASILY MACHINED just like wood frames

COMPOSITE FRAME

WOOD FRAME

PLASTPRO FIBERGLASS DOORS have features to make your entryway and home more energy efficient. Features such as the fully insulated core, anti-leak bottom sweep, and triple-pane insulated glass will protect your home from weather conditions that cost you energy and money.
